🌐 [Portfolio](#)

Computer Science undergraduate passionate about Full Stack Java Development, ServiceNow integration, AI, and Quantum Computing concepts. Skilled in Java, Spring Boot, Fast-API and workflow automation with a focus on building scalable and intelligent applications..

Education

B.Tech in Computer Science and Engineering (AI&DS) (CGPA: 9.2)

2023 – 2027

GMR Institute of Technology, Rajam

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

Projects

Quantum Path Finder 🔗

2026

- Developed a hybrid classical-quantum optimization engine using quantum algorithms and AI-driven analytics to improve route efficiency, reduce delivery time, and enhance fleet resource utilization.
- Implemented real-time route visualization with dynamic map integration, traffic-aware path optimization, and live delivery tracking for efficient logistics management.

Health care Management System 🔗

2025

- Implemented secure role-based authentication for doctors and patients with appointment scheduling, digital health records, and workflow automation features.
- Built scalable REST APIs and integrated AI-powered features for smart record management, analytics, and efficient healthcare service operations.

AI Flash-Cards Generator 🔗

2025

- Implemented automated flashcard generation from PDFs, notes, and user prompts using LLMs and NLP-based content summarization techniques.
- Built an interactive learning platform with real-time quiz generation, progress tracking, and responsive UI to enhance student engagement and learning efficiency.

Personal Portfolio Website 🔗 |LIVE

2026

- Developed a modern responsive portfolio website using React, Vite, Tailwind CSS, and JavaScript to showcase projects, skills, certifications, and achievements.
- Implemented interactive UI animations, mobile-responsive layouts, smooth scrolling effects, and dynamic project sections for an enhanced user experience.

Technical Skills

Languages: Java, C, ,JavaScript

Frontend: React.js, HTML5, CSS3,Anime JS, spline

Backend: Spring, Spring Boot, Fast-API, REST APIs, JWT Authentication

Databases: MySQL

Tools: Git, GitHub

Concepts: OOP, System Design, API Integration, Real-Time Collaboration

Achievements

- 5th place in Quantum valley Hackathon(Government of Andhra Pradesh)
- Presented our healthcare project in front of Sudha Murthy madam(Founder-Chair Person Infosys)

Leadership & Activities

- **ACM and ACMW Coordinator, GMRIT** — Social Media Coordinator and Content Handler for ACM and ACM-W student chapters and coordinated 10+ technical and non-technical events, managing execution, and team collaboration
